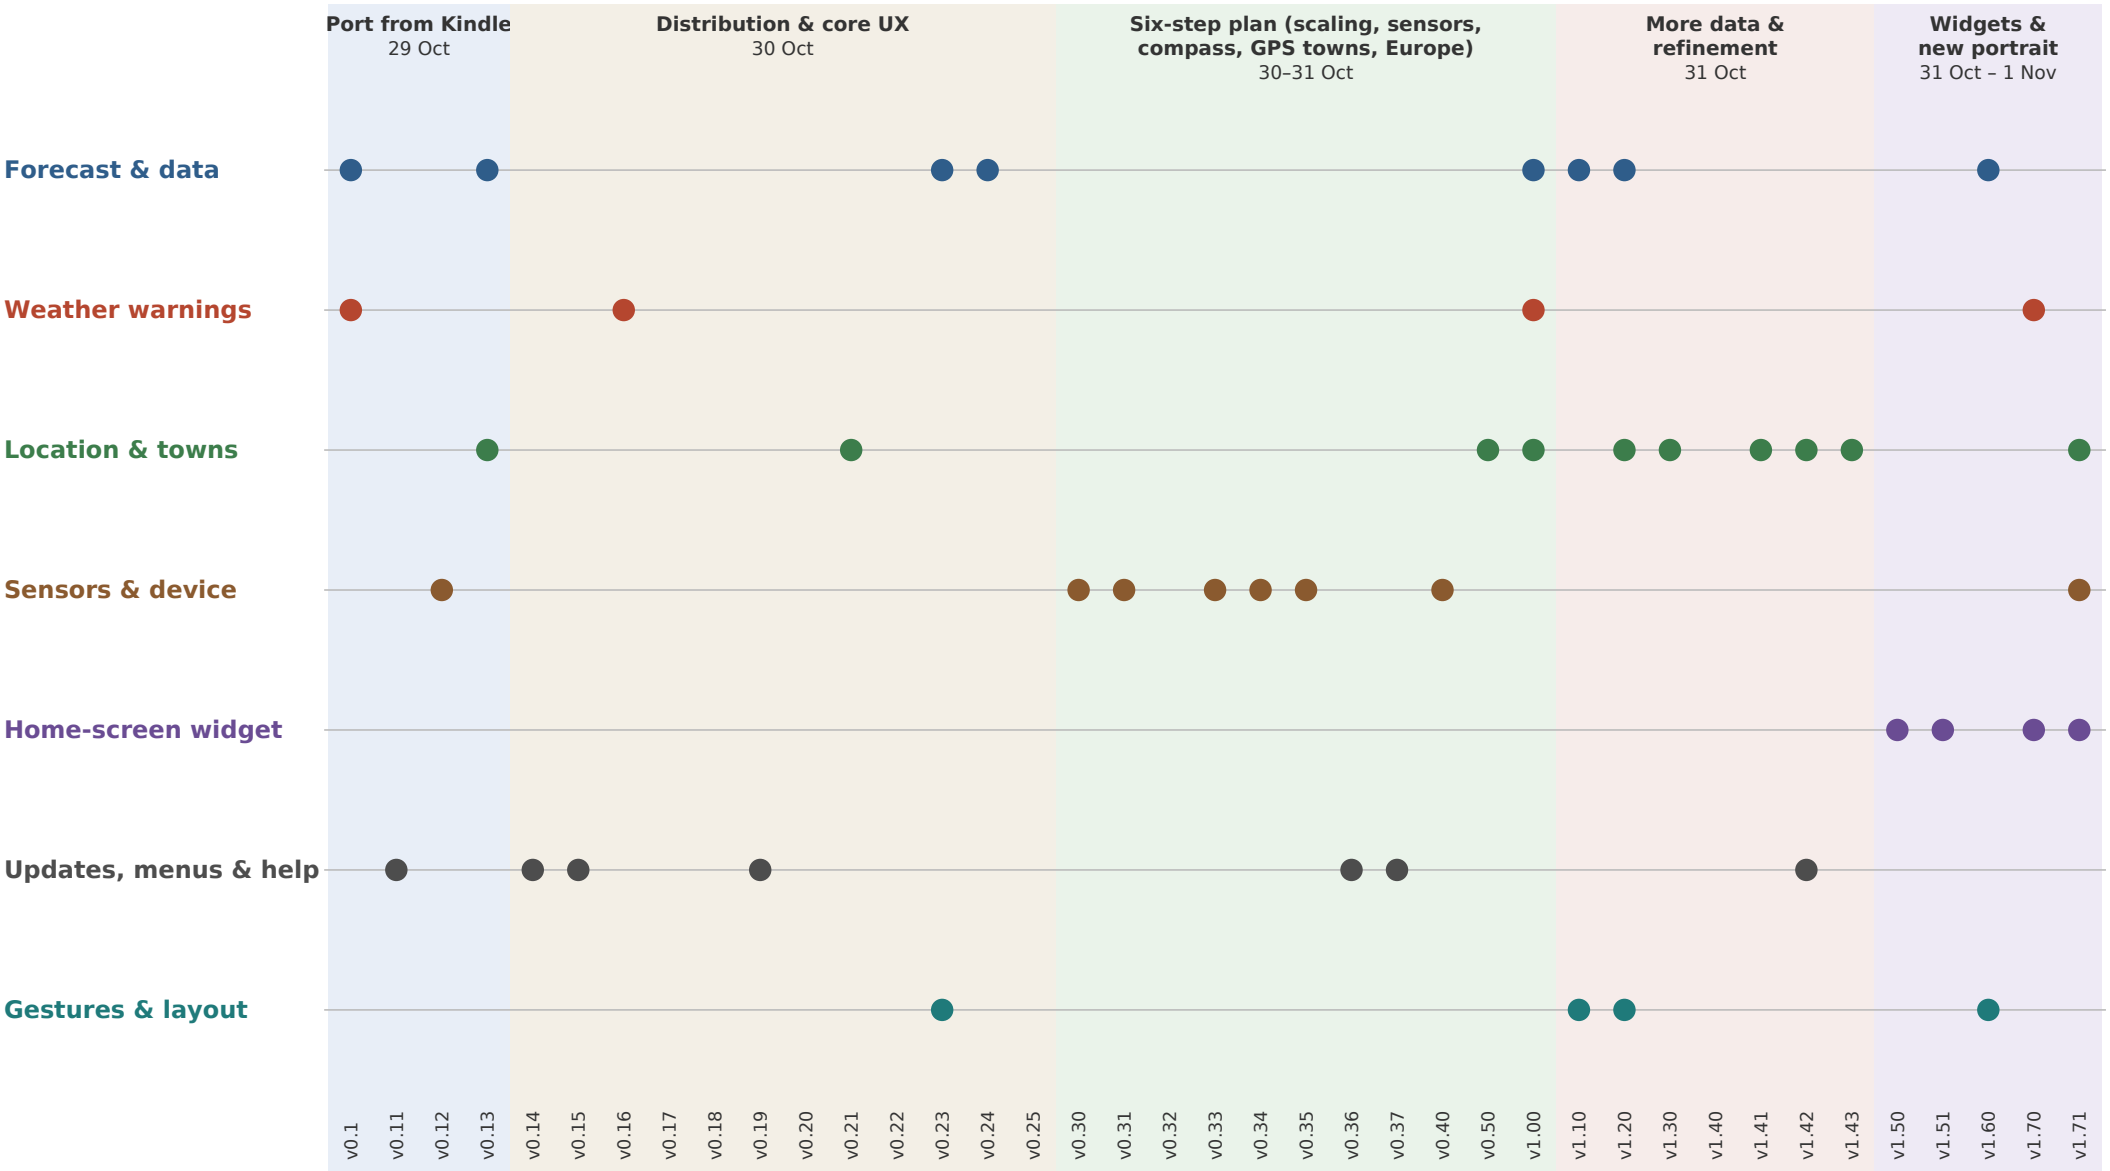
Meteo Alarm Android — project evolution

From the Kindle weather app to Android, v0.1 to v1.71 (29 October – 1 November 2026). Each dot is a version that added or changed a function in that area.



Next: v1.80 (warnings ticker, earthquake box, widget settings, smarter refresh).

39 versions in 4 days · 45 function milestones · 6-step plan completed at v1.00 · weather: Open-Meteo · warnings: ANM and MeteoAlarm · places: OpenStreetMap and the phone's geocoder

Source: the app's change log (assets/jurnal-en.txt). Design-only versions are shown only where they also changed a function.

Function milestones by area

Forecast & data

v0.1 Port of Meteo Alarm Kindle: current weather, 12-hour rain chart, 5-day forecast, sun, UV, pollen (Open-Meteo)

v0.13 Next-hours tiles when the weather is dry

v0.23 Next hours as separate hourly boxes

v0.24 Rain chart becomes the first page of the hourly row

v1.00 UV index fetched separately (the ICON model has none)

v1.10 New info boxes: Moon (rise, set, phase), humidity, air quality (European AQI), pressure with 3-hour trend, wind rose, visibility, compass

v1.20 Cached forecasts missing pressure/visibility are fetched again

v1.60 Five-day forecast = tomorrow + 4 days in equal boxes; precipitation chart shown only when rain or snow is due

Weather warnings

v0.1 ANM (Romania) Cod yellow/orange/red warnings

v0.16 One box per warning code, red code marked with a warning sign, swipe for the third

v1.00 MeteoAlarm warnings for about 38 European countries; working feed per country kept on the device

v1.70 Warnings row in the widget: three pills coloured by the active codes

Location & towns

v0.13 Automatic location at start and every hour; locate button; found towns added to the list

v0.21 Clear on/off state of automatic location

v0.50 Towns learned with the exact GPS position; town changes only 150 m outside its OpenStreetMap boundary

v1.00 Other countries: per-country town lists built on the device

v1.20 Neighbourhood from the phone's geocoder

v1.30 OpenStreetMap neighbourhood fallback

v1.41 Neighbourhood only displayed, only when the source confirms it; source selectable (later dropped: no source knew the area reliably)

v1.42 Tap on the town name = one GPS look; location no longer gets stuck

v1.43 Location button becomes an on/off switch

v1.71 Default town saved, so the widget always knows the place

Sensors & device

v0.12 Landscape: the screen rotates with the phone

v0.30 Tablet layout (short side 600 dp or more), proportional scaling

v0.31 Ambient light sensor theme; Kindle-like brightness slider on the left edge

v0.33 Brightness bar from the sun button, theme switch over it

v0.34 Bar colours follow the phone's system theme (Android 12+)

v0.35 Light-sensor theme fixed and given its own on/off button

v0.40 Compass: wind arrow relative to how the phone is held; night clock while charging at night

v1.71 Android navigation buttons stay visible; the screen fits above them

Home-screen widget

v1.50 Samsung-style widget: icon, big temperature, next sunset/sunrise, town; refreshes every 30 min

v1.51 Widget proportions adjusted (bigger icon, texts that fit)

v1.70 Resizable widget: 2x2, 4x1 and 4x2 layouts from Viorel's mockups, chosen by size; warnings row

v1.71 Widget falls back to the town the app last downloaded

Updates, menus & help

v0.11 Dark theme; theme menu

v0.14 In-app updates from GitHub Releases

v0.15 First-start message (no data collected), weekly update check, Play Protect explanation

v0.19 Change log shown once after every update

v0.36 Kindle-style bubble menus; short on-screen notices; favourites (last 3 towns)

v0.37 Icons for every menu option; full-screen Help page

v1.42 Uniform menu font, menu width fits its longest option; Help kept up to date with every function change

Gestures & layout

v0.23 Pull down to refresh; swipe the hourly row

v1.10 Bottom info boxes in a strip dragged sideways

v1.20 All rows follow the finger with snapping; landscape in three zones

v1.60 New portrait screen from Viorel's mockup: icon above a larger, centred temperature
